

rds One Call

All Services, All Issues, One Company, One Number

RDS One Call makes RDS your single point of contact for all telecommunications related service issues. When a problem occurs with your voice and data services, it is often difficult to identify the source of the problem. Our professionals can locate the source of the breakdown and make sure the correct vendor fixes the problem quickly and completely.

rds One View

Real time access to all telecommunications services

A web based view of all telecommunications services managed through RDS Enhanced Management. New customer activities are audited to ensure all services are captured and entered into the RDS One View portal. A customer view of the portal will be available at no extra cost. Related training is included in the monthly cost of the Enhanced Management Service.
